

Eating A Dead Planet

1. The Sky

Falling from the sky
Floating on a cloud
Your walking on air

Flying like a bird
Flying like a place
You'll know your somewhere

One day you'll say
You knew me once but no way
Falling like a bird
Falling like a cloud

2. John's Son

Suddenly the rain just quit
Gravity stopped pulling
Hands are holding the clouds
So your hands are probably occupied
The surfs are crashing together
We enjoy the cold weather now
We explore
We explore

Oh I know
I know this feeling
Oh I know
I know this feeling

Soon a sign loud and clear
Like four arms reaching down
Which fingers grace the ground
A noise my sweet love found
Eventually we all pretend we are clouds
Mountains drifting on heavens arms
I'd like to be playing a show with a band
Of horses foxes sheep and wolves

Oh I know
I know this feeling

3. Broken Window Love

Stretching onward distant star
Connecting lines and angels are
Holding hands and floating on
Parting souls that meant no harm

I love you

In the morning half past four
Down on the cargo floor

A window broke and you went through
Gliding lightly your body flew

I love you

I love you

I love you

Gravity knows the way we go
It pulls our feet and holds us so
(Your) Falling toward a star that pulls
"I'm so sorry" there no one goes

I love you

I love you

I love you

4. Cold Soup

Do you really miss her smells?
Or wonder how she is so far away?
Do you really care how she is?
Or wonder where she's at and whos she's with?

Your midnight walks on sidewalks
I would know how it feels

Your midnight walks on sidewalks
I would know how it feels

Are pretending that she's at school
For a fall semester or two?
I hate the thought that I would be
Aging backwards without you.

5. Ten

Did you go inside the walls on the edge of the freeway?
What did you find was it the same as what I saw in my
mind?

Those lights flicker on and off but they will stay
beyond civilization.
This theory was proven right beyond all doubt in due
time.

Concourses of waves dividing seas from fish
Numbers and facts conducting ignorant bliss
At night awareness running too thin
Showing in his countenance sinking there in
Crying openly in concourses of angels
Controlling differences caught in tangles
Seemingly dreamingly with righteous voices
Showing in his countenance herds of horses
As he crosses his reflection
Please remember the dream she said
Her eyes heaven's open complexion

Your words it seems you said

We are sitting down we are sitting down

In clouds in clouds

We are going through we are going through

This sound just like before

Did you go inside the walls on the edge of the freeway?

What did you find was it the same as what I saw in my
mind?

6. Ghosts

Have you ever stared into a vast black sky

Dreaming all the ugly things that die

We wore realistic clothes and thought our eyes were
burnt with fire

I put a message in a bottle and threw it to you

It landed in your hair

I took off my shoes and left them by your door

Quickly thought it was yours

Every night in bed I lay awake in the shoes

I left on your doormat

Why did I get so wrapped up in the air

I can't breathe

7. Similar Ghosts

Oh fair eyed lady grace me with your beauty
Which hands hold still a cloud towards sunshine
Oh Daniel be my eyes, butterflies

Oh long legged girl point your toes with your beauty
Even your butterflies it takes will be sung still
Oh Jordan am I the one, tell me

8. Planets

Come home my love
And lay in my chest
Watch as they sleep
The birds in their nest

Empty our sky
High in our tree
Lost in my bed
All we can see

Remember
Remember
Remember
Remember

Its cold outside
And I feel fright

Hold my hands
And sing to me
Lay in the grass
And under a tree
Along with your hands
Graceful can be
Lost in my bed
All we can see

Remember (Planets)
Remember (Planets)
Remember (Planets)
Remember (Planets)

Its cold outside
And I feel fright

Come home tonight
You'll be just fine
Laying awake
Waves in the wake
Sing out your heart
Theres no need to fight
Laying away
Waves all just sway

Its cold outside

And I feel all right

Come home tonight

You'll be just fine

Laying awake

Waves in the wake

Sing out your heart

Theres no need to fight

Laying away

Waves all just sway

Its cold outside

And I feel all right

Planets

Planets

Planets

Planets

9. What do you want to record?

You can't sell your eyes and leave the sun behind

You can't crawl through grass and not bleed the sun
dry

You can't sell your eyes and leave the sun behind

You can't crawl through the grass and expect a long
goodbye

You are grey and your attention is falling away today
Your attention is here to stay

You can't go to sleep tonight
You can't close your eyes tonight
You can't dream your dreams tonight
Can't count you sheep tonight

You are grey and your attention is falling away today
Your attention is here to stay

10. Something For You

It's my problem too
Still I can't let you be
Autumns coming and be with it

Theres another chance
To let these angels give away
A thought two ways two waves

How can it be
A world too big to let me see
Another reason to keep it there awhile

Be the wild between my hair
To the moon

I wanted all of you
There was too much that I didn't know
A world within a world or sand too

I thought often
Of what I'd do to you to make you smile
All the ways the waves

11.Eighteen

Get off
Get off the moon

Easy like green winter gum
Holding to your gums like leaves
Hairs of grass waiting to be fertilizer

As you lay eyes closed
You missed why your fingers only felt flashes
Hold them up to your eyes

As you lay limp the raindrops fell short
Wishing to fall on your skin
And roll down your legs

12.Consuming Old Words

We were old once and it used to be nice

But the glow melts like the sun on ice
Didn't attend your funeral, I went home instead
Now I'll never know exactly where you went

I'm not screening my calls cause my phones turned off
Couldn't afford your words the minutes slowly caught
Through the windows I saw them go
It feels just like this you won't ever know

I've already tried and you let it be
I play it by ear if you could only see
Maybe your hands will be frozen cold
I know this time your hands I will hold

I have your mind this is what I thought
They know you best now I hate you for it
To shorten your strides make you feel my pain
You said it Jay Flash, "Nobody knows my name."

13.Outro

14.Blue Mountain

Blue Mountain wake me up
Let sunrise glide over you
Like big bold mountain true
Like big strong mountain blue

But Mountain keep me warm
Keep my feet from the storm
And send me over too
To be born anew

(Joy)

Now I see the truth
That wondrous light was you
Oh Mountain be my light
And keep me through the night

But Mountain keep me warm
Keep my feet from the storm
And be born anew
To be with you
